

Visualize COVID-19 hotspots using a dashboard

Duration: 3 hours

Build a dashboard using ArcGIS Dashboard, providing visual and analytical information on the Covid19 pandemic. We will cover topics such as data requirements, configuration, and customisation.

Note: Course concepts apply to ArcGIS Online. Esri will provide access to ArcGIS Online for use during class.

Goals

Explore **data requirements** for building a dashboard.

Define dashboard **terminology** and **components**.

Build a dashboard using Covid19 data.

Who should attend?

Refreshing ArcGIS Skills

Intermediate GIS Users

ArcGIS Online familiarity

Suggestion

Familiarity with ArcGIS Online is highly recommended.

Software

Esri will provide the following software to use during class:

- **ArcGIS Online (Creator level).**
