Finding Imagery and Layers to Support your Data

Duration: 2-3 Hours

ArcGIS Online hosts a massive amount of publicly available data, hosted by organisations and individuals, freely available in the ArcGIS ecosystem. Learn how to find what you need for and incorporate public data into your workflow. Explore how you can contribute to this wide network of GIS data.

Note: Course concepts apply to ArcGIS Online. Esri will provide access to ArcGIS Online for use during class.

Goals

Introduction and tips to using **ArcGIS Online**.	**Data considerations** and best practices for choosing data sources**.**	**Find, use, create** and **share** imagery and layers in ArcGIS Online.

Who should attend?

Refreshing ArcGIS Skills   **Intermediate GIS Users**

Suggestion	Software
Basic GIS and computer knowledge are required.	Esri will provide the following access to use during class: • **ArcGIS Online (Creator level)**
